

REVOLUTIONISING DATA CAPTURE – ANY WAY YOU NEED IT

Barcode readers

Brady is proud to present the Code scanners as its gold standard for barcode scanning.

Scan everything that comes your way

Imagine being able to scan all barcodes – small, large, far, near, damaged, reflective, a.o. Give your team the best solution for quick and accurate scanning – no matter the circumstances. Code's patented Dual-Field Optics allow faster scanning of barcodes in all sizes. Code scanners also excel at reading damaged codes and codes that are partially obscured by reflections or other lighting challenges.

Dual-Field Optics technology supports your team's workflow. Team members will be able to focus on core tasks without wasting time with frequent scan position adjustments.

Your data where you need them

Need to adapt your decoded data to integrate with your current systems? ScanFlex JS is a JavaScript application programming interface (API) for many Code scanners that enables any user to:

- read and manipulate data in the scanner memory
- access data sent by host
- transmit data to a host computer

No need to choose between reliability and speed

Near Zero Miss (99.9995%) accuracy has already brought thousands of businesses in many countries the reliability and speed they need to keep their work flowing.

With industry-leading scan accuracy, our Near Zero Miss- readers outscan the competition, both in tests and in real-world performance.

Scan barcodes at lightspeed with the Code scanners!

- **Reliable scanning in the most challenging environments**
- **Easy integration of decoded data in your current systems**
- **Scanning at lightspeed with maximum accuracy**

Visit our website for more information!

Environment

The environment a customer operates in is important for optimal scanner selection.

- In light manufacturing or industrial environments, offer the dark grey CR2700, dark grey CR1500, CR950 or CR5200
- In pharmaceutical or medical industries, the light grey CR2700, light grey CR1500, light grey CR1100 or CR5200 are recommended as they have a higher CodeShield level for superior protection against harsh chemicals.

Wireless or Wired

- For wired scanning: CR1500, CR950, CR1100 or CR5200
- For wireless scanning: CR2700. This scanner communicates via Bluetooth with any BLE enabled device or the charging base (supplied with the scanner) that is connected to a computer.

High density barcodes?

The CR2700, CR1500 and CR1100 are delivered with dual field optics, being able to scan it all - near, far, large, and small. Dual-field scanning lets your workflow flow uninterrupted by frequent scan position adjustments. The technology gives you two lens systems with overlapping scan fields - one is configured for small barcodes and one is configured for large barcodes.

Manually handled or stationary

- For manual handling, CR2700, CR1500 and CR950 are mostly used.
- For stationary reading, CR1100 and CR5200 are preferred, although the other scanners can be used with a mounting stand as well.

Customisable work flow

Sometimes, scanning a code and sending the data as a keyboard input is not enough. All the Brady readers except the CR950 include ScanFlex JS, a unique feature that allows the scanner to manipulate the data and take decisions before sending or storing it.

Revolutionising Data Capture – any way you need it

	CR2700	CR1500
Description	Ultimate Versatility & Mobility	Workflow Optimization
Form Factor	Wireless Handheld, Inductive Charging	Wired Handheld
Good Read Feedback	Customizable audible, visual and haptic	Customizable audible, visual and haptic
Drop Test	Resistant to 1.8 metre drops	Resistant to 1.8 metre drops

3 Increasingly Robust Levels of Disinfectant Ready Plastics

Code Reader™ 2700

Get better visibility throughout your facility

The plug-and-play scanning you need to get the job done right

Battery life lasts a whole shift, and then some

- High-speed, omnidirectional reading of 1D and 2D barcodes
- Eliminate contact failure with inductive charging
- Keeps dust and liquid out with superior IP65 case
- Visual, audible and haptic feedback (can be tailored to workflow needs)
- Adapts to your workflows with multiple programmable buttons
- QuickConnect to host PC via base station, dongle or DirectConnect
- Get full control of scanner and data with powerful JavaScript platform
- Store data for later offload in batch mode
- Enhance data security and extend battery life with Bluetooth® 5 Low Energy
- Proactive management with smart battery with built-in power gauge
- Compatible with Android, iOS and Windows (via USB or Bluetooth)

Code Reader™ 950

Omnidirectional barcode reading meets an enterprise solution

A critical component of your intelligent ecosystem

Maximise your operations with a versatile, lightweight and ergonomically designed solution.

- High-speed, omnidirectional reading of 1D and 2D barcode symbologies
- Manual or automatic triggering
- User feedback with LED and audible tone
- All-inclusive kits include reader, cable and stand
- Reads barcodes on mobile devices
- Efficient power consumption

Code Reader™ 5200

Read barcodes in any orientation. Hands-free operation.

Small but mighty. Powerful scanning performance.

Expedite workflows for greater operational efficiency.

- High-speed, omnidirectional reading of 1D and 2D barcode symbologies
- Presentation reader with easy hands-free operation and enhanced motion detection
- Compact footprint with adjustable reading direction
- Quickly reads barcodes on mobile device screens
- User feedback with LED and audible tone
- Data parsing/formatting eases system compatibility
- Customizable driver license formatting lets users target specific information to populate fields on loyalty forms, credit card applications, and more
- Extended read ranges
- Efficient power consumption

Brady Workstation software

In order to achieve full track & trace control, you can use Brady Workstation apps to quickly design labels, import data from ERP or LIMS-systems, add QR-codes, barcodes or other 2D-codes, serialise and hit print. When printed with the specialised inks of a Brady printer, our label materials can identify items throughout complete production cycles and in storage much more effectively and much longer than any non-specialised solution.

▶ **Try it today! Discover Brady Workstation at www.bradyeurope.com/workstation or download at workstation.bradyid.com.**

Brady Express Labels Mobile app

With our Express Labels Mobile app installed, you can easily design complex labels with 1D and 2D codes and barcodes, serialise, use an extensive image library, include text, a time stamp and even data from the cloud. The app offers the most comprehensive label design capabilities available for any smartphone and includes design wizards to quickly create specific identification labels.

Access files faster. Anywhere you work.

Label file created in the office

Labels pushed to the cloud

Labels printed in the field

- ▶ **20+ barcode types**
- ▶ **85+ fonts**
- ▶ **1,400+ symbols**
- ▶ **Microsoft Excel data imports**
- ▶ **Label sequencing**
- ▶ **Label saving and sharing**
- ▶ **Accurate print preview**
- ▶ **Real-time printer status**
- ▶ **30+ Supported languages**

▶ **Get the free app from Apple App Store or Google Play (Search “Brady Express Labels”)**
